Business Studies

Autumn semester

BS4711 Management Principles

Autumn Year 1
6 ECTS

This module is designed to provide a comprehensive introduction to the area of management. It introduces students to key managerial issues and wider environmental factors affecting organisations. This module aims to develop with students a realistic understanding about management practice and to investigate this in line with management theory. It is designed and delivered to address management issues with specific focus on culture, ethics, leadership and sustainable management practices.

Spring semester

BS4721 Marketing

Spring Year 1
6 ECTS

This module is designed to provide a comprehensive introduction to the area of management. It introduces students to key managerial issues and wider environmental factors affecting organisations. This module aims to develop with students a realistic understanding about management practice and to investigate this in line with management theory. It is designed and delivered to address management issues with specific focus on culture, ethics, leadership and sustainable management practices.

Drama & Theatre Studies

Autumn semester

DT4711 Introduction to Drama, Theatre & Performance

Autumn Year 1
6 ECTS

This module will serve as an introductory module to the themes, ideas and content of the degree programme. It will offer students a broadly-based overview of the traditions, texts, movements and practices of drama and theatre studies.

1 x 2hr lecture, 1 x 1hr tutorial

Very good module as an introduction to the subject

DT4741 Modern Irish Theatre (1601-1960)

Autumn Year 1
6 ECTS

This module will explore the presence and nature of theatre in contemporary Ireland, giving an overview of the development of a theatrical tradition since the Gaelic revival, and looking in greater detail at the form and output of Irish theatre in early part of the twentieth century.

1 x 2hr lecture, 1 x 1hr tutorial

DT4751 Introduction to Ensemble & Devising Theatre

Autumn Year 1
6 ECTS

This module will give students a theoretical and practical introduction to the theatrical concept of ensemble through experiencing a series of workshops aimed at exploring the process of creating theatre. It will introduce the practices of improvisation and of devising theatre work and allow students the opportunity to experience a process whereby they shape and create their own performances. It will focus particularly on the development of working practices essential to the theatrical form: creativity, collaboration, self-expression, trust, innovation and teamwork.

1 x 3hr workshop

Very good module as a practical introduction to the subject

DT4713 Theatre for Young Audiences

Autumn Year 2
6 ECTS

This module will explore, largely through workshop, practical engagement, and the viewing of theatre, the historical origin, tradition and current state of live theatre performance for young audiences (TYA) in the Republic of Ireland and internationally. Theatre for young audiences is a vital component of the programme of contemporary Irish venues and an increasing part of the work of contemporary theatre makers. In this module students will gain a practical, critical and philosophical understanding of theatre for young audiences and its role in the lives of young people.

1 x 2hr workshop/lecture, 1 x 1hr tutorial

DT4733 Contemporary Irish Theatre (1960-Today)

Autumn Year 2
6 ECTS

This module will explore the presence and nature of theatre in contemporary Ireland, looking back across the twentieth century up to the present day, with particular emphasis on the latter half. It will dwell in particular on the plays, festivals, companies and individuals of the last fifty years, and

seek to give participants a strong understanding of the most current and innovative contemporary theatre in Ireland.

2 x 1hr lectures, 1 x 1hr tutorial

DT4743 Ensemble Performance 2

**Autumn Year 2
12 ECTS (double-weighted
module)**

This practical module will involve the students taking part in a full ensemble theatre production, which will be led by Faculty and industry professionals in all departments. All students will be assigned by Faculty to a performance or a production (technical/administrative) role in the production, which will be produced in a professional manner and according to industry norms and standards. The finished piece will be performed publicly in a professional theatre space, with appropriate costuming, set, lighting and stage properties.

Access to this module is restricted to suitably experienced students who have a performing arts background. Please contact Michael.Finneran@mic.ul.ie directly if interested.

Two days per week

10am-6pm + additional time commitments TBC

DT4717 Scenography, Costume & Lighting Design

**Autumn Year 4
6 ECTS**

Scenography is the art of creating performance environments (Howard 2002). It refers to the visual, spatial and aural aspects of theatre production. Progressing the work of previous modules in technical theatre and ensemble performance, this module will give students an opportunity to explore in an in-depth manner the history and theory of design principles and practices in the contemporary theatre. Students will engage practically with a facet of theatre of interest to them and create work in a studio-based environment that is presented in a portfolio as part of their professional development.

1 x 3 hr workshop

DT4727 Cultural Policy & Administration

**Autumn Year 4
6 ECTS**

This module will explore the policy, business, and economic context of making and producing theatre in Ireland. It will seek to give students an insight into the range of national and local agencies and organisations that have a mandate in the performing arts, in both the formal and non-formal performance sectors. It will examine the workings of cultural organisations and look to the programming, financial, social, cultural, and political considerations that govern the theatre sector, from the perspective of producing companies, touring companies, companies that have an educational or young audience focus, and receiving houses/arts centres.

1 x 2hr lectures, 1 X 1 hr tutorial

DT4747 Directing & Writing for Theatre

**Autumn Year 4
6 ECTS**

This module will deal with two of the most prominent and advanced skills of theatre production: directing performances and writing scripts. In contemporary theatre, the boundaries between these roles is often blurred. This is particularly the case in devised and collaborative work, where either or both sometimes do not exist. An understanding of both is essential, however. The new and contemporary role of the Dramaturg will also be examined.

1 x 2hr lecture, 1 X 1hr workshop

Spring semester

DT4722 Introduction to Applied & Social Theatre

**Spring Year 1
6 ECTS**

This module will introduce to students the broad idea of applied theatre, an understanding of which is core to the nature of the degree programme. It will examine the social function and origins of applied drama and theatre and contextualise their place within contemporary theatre. The module will examine where applied theatre and theatre for social change can be found in contemporary practice.

1 x 2hr lecture, 1 x 1hr tutorial

DT4714 Contemporary European & World Theatre

**Spring Year 2
6 ECTS**

This module will explore the significant play-texts, performance styles, practitioners and theatre companies in contemporary World and European theatre. In doing so, it will first look back across the developments of the twentieth and early twenty-first century. It will dwell in particular on those movements and people whose theatrical work has had a significant relationship with societal and cultural movements and/or those which have had an impact beyond the walls of the theatre.

1 x 2hr lecture, 1 x 1hr tutorial

DT4734 Storytelling & Poetry in Performance

**Spring Year 2
6 ECTS**

The centrality of storytelling to the Irish oral, communal dramatic tradition and performance culture will lie at the heart of this module. It will examine, largely in practical and experiential ways, the manner in which both poetry and stories can be utilised both as performative entities in their own right, but also the ways in which both can be the inspiration and starting point for dramatic performance.

1 x 3hr workshop

DT4754 Performance and Music

**Spring Year 2
6 ECTS**

This module will overview and explore the broad intersection of dramatic and musical forms. It will focus upon four distinct areas of that territory: opera, musical theatre, live music in dramatic performance, and soundscape/soundtrack in the theatre. The course will consist of both an historical overview with the place and ideas of music in theatrical settings, but also facilitate a practical exploration of that engagement.

1 x 2hr lecture, 1 x 1hr workshop/tutorial

DT4718 Drama Education

**Spring Year 4
6 ECTS**

This module will extend students' knowledge and understanding of the aims, content, practices and procedures of drama, and will frame them in an educational and pedagogical context. It will give students and understanding of the teaching of drama in the formal school sector, both

primary and secondary, but also in the informal educational sector. It will look particularly at the role of the teaching artist, and at best collaborative practice involving artists and teachers working alongside each other in school settings.

1 x 3hr workshop

DT4728 Contemporary Theories of Performance

**Spring Year 4
6 ECTS**

Performance studies explores the nature of performance of any kind, ranging from the artistic to the ritualistic to the communal. This module enables students to engage with the full range of meanings of performance, exploring the benefits of understandings drawn from a range of interdisciplinary areas such as anthropology, literature, sociology, folklore and linguistics. This module is central to understanding the function, nature and place of contemporary and applied theatre in Ireland and the world.

1 x 2hr lecture, 1 x 1hr tutorial

English Literature

Autumn semester

EH4711 Introduction to Literature 1

Autumn Year 1
6 ECTS

Introduction to the skills needed for responding to poetry, drama and prose fiction with pleasure and insight.

EH4713 The Development of Modern Drama

Autumn Year 2
6 ECTS

Emergence of modern drama; innovatory trends and developments in 20th century theatre; Theatre of Realism; Theatre of the Absurd; modern tragicomedy; Irish dramatists.

EH4734 The Novel in the 20th Century

Autumn Year 2
6 ECTS

A study of the development of different aspects of the modernist and postmodernist novel form in the 20th century. Selections from Irish, European and American authors.

EH4717 Literary Modernism

Autumn Year 4
6 ECTS

An investigation into the nature of the major formal technical innovations in the twentieth century literature through an analysis of some notable primary texts: Modernism and the form of the novel; the gender of Modernism; Modernism and the poetic voice.

EH4727 Interpreting Literature

Autumn Year 4
6 ECTS

The practice of literary criticism and the principal features of literary theory from classical to modern times: the classical debate: renaissance neo-platonism and neo-classicism: the Enlightenment: European romanticisms: New Criticism: Structuralism: Marxism: Feminism: Post-Structuralism and after. Applications of theoretical models to different texts and generic structures.

Spring semester

EH4712 Introduction to Literature 2

Spring Year 1
6 ECTS

Expansion and deepening of the knowledge of poetry, drama and fiction developed in EH4711.

EH4724 Irish Poetry and prose

Spring Year 2
6 ECTS

The development of Irish poetry and prose, with special focus on the novel from before the Act of Union to the present day: cultural nationalism and romanticism: the retrieval of the Celtic past and the invention of Ireland: poetic and political mythologies and ideologies: the crises of identity: the language question.

EH4754 Literature and Society

Spring Year 2
6 ECTS

This module will introduce students to a range of historical and contemporary issues, including: gender and sexuality; race; imperialism; memory; technology; globalization and environmentalism.

Through a selection of poetic, dramatic, prose literary texts the module will highlight the formal and thematic ways in which literary studies engages with and critiques the emerging and dominant value systems that contour its contemporary context.

EH4718 Elizabethan-Jacobean Theatre: Shakespearean Drama and its Contexts

**Spring Year 4
6 ECTS**

Drawing on selected texts, attention will be given to a range of the following: drama and society in the 16th and 17th centuries: Shakespeare as an Elizabethan-Jacobean playwright: Shakespeare and tragedy: dynamics of the comic form: presenting the female: patriarchal structures: political Shakespeare: power, ideology and theatrical representations: critical approaches, readings and interpretations of the plays and the formal properties of Shakespeare's dramatic art.

EH4728 Romantic Literature in English

**Spring Year 4
6 ECTS**

Selections from the literary and critical works of the principal writers of the Romantic movement, e.g., Wordsworth, Coleridge, Blake, Keats, Shelley, etc.

English Language

Courses in English language are offered in both the Autumn and Spring semesters. These modules are designed to meet the language needs of intermediate to advanced non-native speakers of English studying at university level. Students are assigned to the appropriate module based on their language proficiency. Language needs analysis is conducted to tailor course content to respond to students' requirements. Each course is worth 6 ECTS.

Autumn semester

EF4721 English as a Foreign Language

Autumn
6 ECTS

The English as a Foreign Language [EFL] modules aim to provide students with the opportunities to develop their communication skills more accurately and fluently in both oral and written expressions of English.

EA4721 English for Academic Purposes

Autumn
6 ECTS

The English for Academic Purposes [EAP] modules will assist students in improving their academic reading and writing skills in terms of structure, register and accuracy of expression in addition to developing their communication skills.

TL4715 Teaching English as an Additional Language

Autumn
6 ECTS

This module focuses on teaching English as an additional language at primary and secondary level, including classroom management and pedagogy.

Please note: This module is offered depending on demand.

Spring semester

EF4722 English as a Foreign Language

Spring
6 ECTS

The development of Irish poetry and prose, with special focus on the novel from before the Act of Union to the present day: cultural nationalism and romanticism: the retrieval of the Celtic past and the invention of Ireland: poetic and political mythologies and ideologies: the crises of identity: the language question.

EA4722 English for Academic Purposes

Spring
6 ECTS

The English for Academic Purposes [EAP] modules will assist students in improving their academic reading and writing skills in terms of structure, register and accuracy of expression in addition to developing their communication skills.

TL4715 Teaching English as an Additional Language

Spring
6 ECTS

This module focuses on teaching English as an additional language at primary and secondary level, including classroom management and pedagogy.

Please note: This module is offered depending on demand.

French Studies

Autumn semester

FR4721 French Language & Civilisation

Autumn Year 1
6 ECTS

One weekly lecture will aim at providing first-year students with an overview of the main historical events and figures which have contributed to the shaping of France as a nation throughout the centuries. A second weekly lecture will focus on France's current social and political organisation. The acquisition of formal grammatical skills will be the focus of a third weekly lecture which will be complemented by a weekly small-group tutorial dedicated to grammar and translation exercises.

No pre-requisites. Limited places available depending on the number of students registered.
Not suitable for international students coming from a French-speaking country.

FR4731 French for Beginners I

Autumn Year 1
6 ECTS

One weekly lecture will provide first-year *ab initio* students with an overview of the main historical events and figures which have contributed to the shaping of France as a nation throughout the centuries. A second weekly lecture will focus on France's current social and political organisation. The acquisition of the basics of French grammar and vocabulary will be the focus of three weekly tutorials.

No pre-requisites. Limited places available depending on the number of students registered. Students who took French as one of their Leaving Certificate subjects [or equivalent] and who obtained at least a C3 [or equivalent] in French are not permitted to take any of the modules entitled 'French for Beginners'. Not suitable for international students coming from a French-speaking country.

FR4743 The French & Love

Autumn Year 2
6 ECTS

Cultural approaches to love differ significantly from one country to another. France is often described as the country of love and seduction par excellence. This second-year module offers to explore the origins and evolution of this stereotypical perception of the French lover through the study of a number of literary texts representative of different historical periods. The key role of art in general and literature in particular in the formation and/or transmission of social codes will be studied along with the complex mechanisms involved in the constitution of cultural stereotypes.

FR4734 French Expression I

Autumn Year 2
6 ECTS

Translation from and into French and development of practical language skills. Discussion of a range of subjects relevant to social and cultural trends in contemporary France as exemplified in appropriate articles taken from French magazines and newspapers; general conversation.

No pre-requisites. Limited places available depending on the number of students registered.
Not suitable for international students coming from a French-speaking country.

FR4767 Intellectuals & Decolonisation in France

Autumn Year 4
6 ECTS

Lectures will focus attention on the involvement of intellectuals in the French political sphere. We will discuss the importance of the figure of the public intellectual in France, and the manner in which prominent members of the intelligentsia became involved in crises of decolonization that

transformed the country's social and political landscape. Thus, students will be encouraged to interrogate the role played by the intellectual elite in the reconstruction - both figurative and literal - of the Republic in the years immediately following the Second World War, and, more specifically, throughout the process of decolonization. Seminars will focus on the analysis and translation of texts written by intellectuals during the period of decolonisation. This will consolidate students' linguistic and translation skills while also drawing attention to the concept of discourse analysis, power and manipulation of language.

No pre-requisites. Limited places available depending on the number of students registered.
Not suitable for international students coming from a French-speaking country.

FR4746 Reason & Sensibility

Autumn Year 4
6 ECTS

The 18th and 19th centuries in France were a period of rapid modernisation, aggravated social tensions, and literary and artistic innovation. This module sets out to explore the two defining pillars of the Enlightenment – reason and sensibility – as expressed through the literature of the age. The course will focus on a selection of works by leading thinkers and writers, each of whom brings a different vision of life.

Spring semester

FR4732 French Language & Culture

Spring Year 1
6 ECTS

This module is comprised of a cultural and a language component. The team-taught, cultural component is divided into two strands: Introduction to the History of Art and Literature and Children's Literature. A weekly hour-long lecture will be dedicated to each strand, which, together, will introduce students to essential cultural reference points from the past, a selection of famous children's literature as well as broad overview of the evolution of French art and literature from the Renaissance to the present. The language component will combine one lecture hour per week with written language and laboratory classes which will alternate weekly. The focus in the language lecture will be on French grammar and essay writing skills in French and English, while in tutorials students will hone their skills of comprehension, composition, and translation through group work on short texts drawn from a variety of media that relate to French culture.

No pre-requisites. Limited places available depending on the number of students registered.
Not suitable for international students coming from a French-speaking country.

FR4742 French for Beginners II

Spring Year 1
6 ECTS

This module is comprised of a cultural and a language component. The team-taught, cultural component will introduce students to the history of French art and literature. The language component will combine two weekly written language tutorials and two weekly laboratory classes to strengthen and further develop the students' knowledge of French grammar and idiom through intensive translation, comprehension and pronunciation exercises.

No pre-requisites. Limited places available depending on the number of students registered.
Students who took French as one of their Leaving Certificate subjects [or equivalent] and who obtained at least a C3 [or equivalent] in French are not permitted to take any of the modules entitled 'French for Beginners'.

Not suitable for international students coming from a French-speaking country.

FR4753 Writing the Modern Self**Spring Year 2
6 ECTS**

This course studies the tortuous relationships between fact and fiction as famous French writers focus on their own lives. We will study how identities are constructed through gender, class and race, and will discuss identity formation [and its breakdown] through certain literary and philosophical theories [existentialism, modernism, Marxism, postmodernism]. After considering passages from Rousseau's model autobiography, *Les Confessions*, we turn our attention to twentieth-century authors such as André Gide, Nathalie Sarraute, Jean-Paul Sartre, Marguerite Duras, and Patrick Modiano.

FR4783 Trials & Traumas of Wartime France**Spring Year 2
6 ECTS**

This module combines literary, political, social and cultural history approaches in order to explore the nature of the French experience of Occupation during the Second World War and to examine the ways in which such experience has been commemorated in the years since Liberation in 1944. The lectures will provide students with a comprehensive overview of the historical events leading up to and including the Occupation and thus explore the various trials and traumas of wartime France. This will be complemented in seminars through close reading, discussion and translation of excerpts from key journalistic and other non-fictional/fictional texts dating from the period in question. Selected literary and cinematic retrospective representations of these 'dark years' will also be studied with a view to introducing students to ongoing debates concerning the historiography of wartime France. Students will acquire background knowledge of the history of the Second World War in France. They will analyse a range of cinematic and literary responses to the Occupation in order to understand the different, often conflicting, ways in which the Occupation has been remembered in France. In addition to the two weekly lectures, students will attend three weekly tutorial hours dedicated to conversation, language lab and translation.

*No pre-requisites. Limited places available depending on the number of students registered.
Not suitable for international students coming from a French-speaking country.*

FR4726 French Expression II**Spring Year 4
6 ECTS**

An advanced course in French grammar and translation; investigation of language registers; analysis of literary style. Discussion of a range of subjects relevant to social, political and cultural trends in contemporary French society; reading of short unseen passages in French; general conversation based on extracts taken from a selection of French newspapers and magazines.

*No pre-requisites. Limited places available depending on the number of students registered.
Not suitable for international students coming from a French-speaking country.*

FR4777 French Production & Performance**Spring Year 4
6 ECTS**

This module aims to introduce students to the history of French theatre and will give students an opportunity to perform a whole play and/or passages of famous plays. Live performance will enable students to develop their communication and pronunciation skills while, at the same time, enabling them to acquire more vocabulary and improving their translation skills.

Limited places might be available depending on the number of students already registered for this module, please speak to the module coordinator.

Gaeilge Ab Initio (Irish Language for Beginners)

Autumn semester

GA4001 Gaeilge ab Initio

Autumn
6 ECTS

Gaeilge ab Initio is an Irish language course for beginners, concentrating on the spoken language. The emphasis is on the basic communication skills and grammar of the language, allowing the students to converse in Irish on matters concerning themselves and their interests. Course content includes: background and history of the Irish Language; Irish Language today; Irish mythology; Introduction to Irish place-names and Gaeltachtaí [Irish-speaking areas].

No pre-requisites.

Spring semester

GA4001 Gaeilge ab Initio

Spring
6 ECTS

Gaeilge ab Initio is an Irish language course for beginners, concentrating on the spoken language. The emphasis is on the basic communication skills and grammar of the language, allowing the students to converse in Irish on matters concerning themselves and their interests. Course content includes: background and history of the Irish Language; Irish Language today; Irish mythology; Introduction to Irish place-names and Gaeltachtaí [Irish-speaking areas].

No pre-requisites. Repeat of module offered in Autumn semester

Geography

Autumn semester

GY4741 The Dynamic Earth

Autumn Year 1
6 ECTS

The module aims to demonstrate the dynamic nature, and inter-relationships through time, within and between the Earth's four physical systems, namely the atmosphere, the geosphere, the hydrosphere and the biosphere. The topics to be covered will therefore include the following: continents and oceans; climate and weather; water resources and management; soils and ecology. Lectures will be accompanied by a series of laboratory classes providing an introduction to relevant geographical skills and techniques.

GY4703 Evolution of the Irish and British Landscapes

Autumn Year 2
6 ECTS

The geological time scale; plate tectonics; the Grampian, Caledonian, Variscan and Alpine Orogenies; the closure of the Iapetus Ocean; the formation and disintegration of supercontinents; the Tertiary Period; the Quaternary Period, glacial and interglacial phases, the Last Glacial Maximum, glacial sediments and landscapes; fluvial geomorphology; the formation of karstic landforms; periglacial processes and landforms; coastal geomorphology, changing coastlines, causes and effects of relative sea level change.

GY4733 Political Geography: Geopolitics and Governance

Autumn Year 2
6 ECTS

Power, space and political geography; geopolitics, places, politics and international relations; geopolitical structure and agency; geopolitical codes and representations; geopolitics and national identities; boundary geopolitics; geopolitical metageographies, internationalisation of terror; state processes and patterns; making states work, the variety of local state systems; state bureaucracy; institutional and political cleavages; state and civil society; territorial and multi-level governance; nations and nationalism; multiculturalism; nationalism and conflict; future of the nation-state.

GY4708 Global Environmental Change

Autumn Year 4
6 ECTS

Global climate change; past climates, air quality, air pollution, biological response to climate change; human impact on the earth's surface, agriculture, deforestation, desertification, irrigation, biodiversity loss, coastal zone issues; water resources and pollution, demand for water, marine and freshwater pollution, groundwater abstraction.

CEFR level B2 English

GY4747 Tourism and Heritage Management

Autumn Year 4
6 ECTS

Understanding tourism, concepts and methods of analysis; prospects and challenges for tourist provision, global, national and local issues; rethinking tourism impacts; economic impacts; physical impacts; social impacts; tourism planning and policy at the international and supranational level; tourism planning and policy at the national and sub-national level; sustainable tourism; understanding heritage, concepts and methods of analysis; heritage landscapes; heritage management; heritage providers; heritage representation in areas of conflict; heritage interpretations; future role of the heritage industry.

Spring semester

GY4742 Processes and Patterns in Human Geography

Spring Year 1
6 ECTS

The module will explore the interactions between environmental and human processes at the global, national, regional, and local levels. Topics include: worlds in the past; political geographies, geopolitics and governance; cultural systems and identity; society, settlement and land use; population, resources and the environment; development and urban and regional geographies. In addition, the module will contain a skills-based component providing an introduction to map reading and cartography.

GY4744 Biogeography

Spring Year 2
6 ECTS

Biogeographical theory; historical biogeography; island biogeography; domestication and agriculture; coastal biogeography; ecosystems; biodiversity; environmental change; conservation and habitat management; human impact on ecosystems.

Module may incorporate up to two days of fieldwork.

GY4754 Reading the Irish Cultural Landscape

Spring Year 2
6 ECTS

The study of Irish historical geography, concepts and methods of analysis; primary and secondary sources; pre-historic Ireland, geography and archaeology; 'Celtic' landscapes; society and settlement in the iron age; early medieval Ireland, Vikings, proto towns, the development of the early Irish church; medieval landscapes in Ireland, from Gaelic to feudal power; 17th century landscapes, the civil and down surveys; plantation landscapes; society and settlement in 18th century Ireland; landlords, enclosures and famine, the changing nature of the 19th century landscape.

Module may incorporate up to one day of fieldwork.

GY4764 Field Studies in Geography

Spring Year 2
6 ECTS

This module aims to provide intensive training in a wide range of geographical techniques through the format of a residential field course at an appropriate location. In addition students will engage in the planning and execution of individual and group research projects. The module will focus on interpreting both the human and physical landscapes of an appropriate location (either on the island of Ireland or overseas) and will cover some of the fundamental aspects associated with field work such as, but not exclusive to: field observations and accurate recording in a field notebook; qualitative and quantitative data collection techniques (e.g. archives, census data, interviews, survey questionnaires, photography, transects, surveying) and data analysis, interpretation and presentation. The topics that are covered in any given year will vary according to the staffing arrangements within the department.

*This module incorporates a week-long (6 days) fieldtrip, the destination for which will be confirmed at the start of semester. **Module enrolment is capped at 30 students.***

GY4707 Reconstructing Past Environments**Spring Year 4
6 ECTS**

The nature of climate and climatic variation over geological time; climate system feedback mechanisms; Quaternary environmental change; reconstructing vegetation and landscape history; reconstructing environmental pollution; lithological evidence, glacial and periglacial sediments, palaeosols, lake and peatland sediments, marine sediments, wind-blown sediments, cave deposits, ice cores; biological evidence, terrestrial, marine and freshwater macro- and microfossils; dating and chronological techniques, stratigraphical correlation; field methods and techniques.

Module may incorporate up to one day of fieldwork.

CEFR level B2 English

GY4758 Geography of the Developing World**Spring Year 4
6 ECTS**

Development theories and concepts; sustainable development issues, principles and practices; causes of under-development; global development trajectories and patterns; manifestations of under-development; economic, socio-cultural and ecological consequences of under-development and inequality; natural hazards, earthquakes, volcanoes, tsunamis, coastal and river flooding, cyclones, and wildfires; resource distribution and allocation; conservation and environmental protection; individual, political, social and institutional responses, roles and responsibilities; development approaches and strategies; exogenous and endogenous development.

CEFR level B2 English

German Studies

For further information or queries regarding your suitability for a particular module, contact Dr Christiane Schönfeld, the Head of the Department of German Studies (christiane.schonfeld@mic.ul.ie) or speak to your Erasmus supervisor.

Autumn semester

GE4711 Deutsche Sprache, Kultur und Literatur 1

Autumn Year 1
6 ECTS

An introduction to German-language culture, history and literature of the twentieth century through the discussion of film, fictional and non-fictional texts and intensive language practice. The grammar lecture in the language element focuses on the reflection and extension of existing (second level) grammatical knowledge and new approaches to language learning. In the accompanying communication skills tutorial, conducted in small groups, students apply grammatical structures in oral and written communication at A2/B1 level (Common European Framework of Reference for Languages). Classes in *Kultur* and *Literatur* consist of one lecture in English (*Kultur*) and one interactive workshop in German (*Literatur*). In the culture lecture, sources from various media are used to highlight aspects of German-speaking cultures. The literature class involves the reading and discussion of a literary text to provide students with further access to these topics and to develop their reading and analytical techniques. Please note: The focus on Germany or Austria/Switzerland/Liechtenstein in 'culture' may alternate between S1 and S2.

The module consists of 4 contact hours in total (with additional, *non-compulsory* communication/language practice opportunities in the Franco-German House).

Textbook for the language element of the module: *Studio 21* [A2]

CEFR level A2.

Limited places available depending on the number of students registered.

GE4701 Ab Initio 1

Autumn Year 1
6 ECTS

This module is aimed at beginners in German. In the culture lecture, which is held in English, sources from various media are used to highlight aspects of German-speaking cultures (1 hour, see GE 4711). The main focus of this module is on acquiring German language skills at A1 level, which includes the introduction to grammatical structures and their application as well as the development of oral and written communication skills in intensive language tutorials, conducted in small groups. *Ab initio* students have 4 contact hours in total (with additional, *non-compulsory* communication/language practice opportunities in the Franco-German House). This module is aimed at students without or with very basic German language skills.

No pre-requisites.

Limited places available depending on the number of students registered.

Not suitable for students with a considerably higher level of German.

GE4713 Deutsche Sprache und Linguistik 1

Autumn Year 2
6 ECTS

The module consists of classes in grammar, linguistics, writing and oral communication skills. The grammar lecture explores grammatical structures at CEFR level A2/B1. Communication skills are further developed through written and oral discussion of topical issues in specific writing skills and communication skills tutorials. The linguistics lecture introduces students to the history and

development of the German language, looks at both contemporary language debates and the variety of the German speaking areas, and provides a practice-oriented overview on phonology and phonetics. The module consists of 4 contact hours in total.

Textbook for the language element of the module: *Studio 21* [B1]

CEFR level A2/B1.

Limited places available depending on the number of students registered.

GE4723 Deutsche Literatur und Kultur 1

**Autumn Year 2
6 ECTS**

This module provides an insight into the history of modern German literature and society from the late eighteenth to the late nineteenth century. Classes consist of one lecture in English (Kultur) and one interactive workshop in German (Literatur). Students are introduced to the literature and ideas of a particular period of this time within its wider cultural context. The main focus in an academic year may be one or more of the following: the Enlightenment, Storm and Stress, Weimar Classicism, Romanticism, Vormärz, Realism and Naturalism. At the same time, students gain an insight into the German culture(s) of this time in a wider sense, including the structures of society and in how far “German” is a useful term here. Selected topics for exploration may include the rise of the middle classes in the eighteenth and nineteenth centuries, the situation of women and ethnic minorities, the development of nationalism and the founding of the German nation state. The module consists of 3 contact hours in total.

Contact sabine.egger@mic.ul.ie for further information.

Working knowledge of German required (CEFR level B1 minimum).

GE4717 Deutsche Sprache und Linguistik 3

**Autumn Year 4
6 ECTS**

The final year language components continue work on complex grammatical structures with the aim of developing a high degree of fluency and correctness in spoken and written German. Emphasis is placed on stylistic improvement and language awareness in translation and writing skills classes as well as in the oral communication skills tutorial. In the linguistics lecture students will be introduced to applied linguistics.

The module consists of 4 contact hours in total.

Textbook for the language element of the module: *Studio 21* [B2.1]

CEFR level B2.

The content of the linguistics element in GE4717 and GE4718 may vary in a particular year. Please contact Helmut Grugger at helmut.grugger@mic.ul.ie for further information.

GE4727 Deutsche Literatur und Kultur 3

**Autumn Year 4
6 ECTS**

This module explores selected movements within literature and the arts during specific periods and against the backdrop of social change. Topics are subject to change. During the 2023 autumn semester, the module will focus on the experience and representation of exile in German-language literature and in non-literary texts produced between 1933 and 1945, when most notable authors were forced by the fascist and racist actions of the Nazi regime to leave their homes for an uncertain future abroad. Both in the ‘culture’ and in the ‘literature’ elements of the module, other relevant areas of cultural production in exile—such as journalism or screenwriting and filmmaking—will also be of interest.

The module consists of 3 contact hours in total.

Contact Christiane Schönfeld (christiane.schonfeld@mic.ul.ie) for further information.

CEFR level B2.

Good working knowledge of German required.

Spring semester

GE4712 Deutsche Sprache, Kultur und Literatur 2

**Spring Year 1
6 ECTS**

This module continues all aspects of the work begun in 4711 within a similar course structure. The language element, consisting of a grammar lecture and a communication skills tutorial, continues the analysis and practice of grammatical structures and vocabulary work on A2/B1 level begun during the autumn semester. In the culture lecture, film and other media are used to highlight aspects of contemporary German culture. Emphasis is given to the political and cultural division of Germany after 1945 and the situation after unification in 1990. The literature/film workshop also allows participants to practise their reading techniques, principles of textual and/or film analysis and writing skills. Please note: The thematic focus on Germany or Austria/Switzerland/Liechtenstein in 'culture' may alternate between S1 and S2. The module consists of 4 contact hours in total (with additional, non-compulsory communication/language practice opportunities in the Franco-German House).

Textbook for the language element of the module: Studio 21 [A2.2]

CEFR level A2/B1.

Limited places available depending on the number of students registered.

*Students should contact the Department of German Studies directly **in advance** to enquire about their suitability for this module.*

GE4702 Ab Initio 2

**Spring Year 1
6 ECTS**

In the culture lecture, held in English, film and other media are used to highlight aspects of contemporary German-language culture. Emphasis is given to the political and cultural division of Germany after 1945 and the situation after its unification in 1990. Students gain an insight into political and social structures, such as the education system or the situation of migrant communities and learn how these are reflected in aspects of everyday life, youth cultures and other subcultures (see GE4712). The grammar lecture and language tutorials continue the intensive practice of grammatical structures, vocabulary work, written and oral language skills begun during semester 1. The module consists of 4 contact hours in total (with additional, non-compulsory communication/language practice opportunities in the Franco-German House).

Textbook for the language element of the module: Studio 21 [A1.2]

Prerequisite: GE4701 / Ab Initio 1 [or similar introduction to the German language].

*Limited places available. Students **are required** to contact the Department of German Studies directly **in advance** to discuss their suitability for this module and the content of the course for the semester.*

Not suitable for students with a substantially higher level of German.

GE4714 Deutsche Sprache und Linguistik 2

**Spring Year 2
6 ECTS**

An extended survey of grammar at CEFR level B1 / B2. Improvement of students' oral, aural, and writing skills in German through the discussion of a wide range of familiar and relevant topics. The linguistics lecture continues work begun in the autumn semester, focusing this term on different structural elements of the German language. In addition to concepts of morphology, syntax, and

semantics, the lecture will introduce students to the realm of pragmatics. The module consists of 4 contact hours in total. Textbook for the language element of the module: Studio 21 [B1.2]

CEFR level B1.

*Students should contact the Department of German Studies directly **in advance** to enquire about their suitability for this module.*

GE4724 Deutsche Literatur und Kultur 2

Spring Year 2
6 ECTS

This module provides an insight into the history of German literature, culture and society of the 20th century. Classes consist of one lecture on cultural contexts (Kultur) and a 2-hour interactive workshop in German (Literatur/Film) per week. Students are introduced to the literature and other products of the modern culture industry within their wider socio-political contexts, providing an overview of the history of German literature and society from 1900, with a focus on the first half of the 20th century. Students are introduced to avant-garde movements such as Expressionism, Dadaism, New Objectivity, the culture industry under National Socialism, post-1945 rubble film and “Kahlschlag”-literature, concrete poetry etc. This module provides an opportunity to develop further research, literary/film analysis and presentation skills while improving competency in the German language. The module consists of 3 contact hours in total. Contact christiane.schonfeld@mic.ul.ie for further information.

Working knowledge of German required (CEFR level B1 minimum).

GE4718 Deutsche Sprache und Linguistik 4

Spring Year 4
6 ECTS

The module continues the language work of GE4717 and revises important grammatical structures. The linguistics lecture will focus on one of the aspects of applied linguistics discussed in GE4717, such as pragmatics, contrastive linguistics, sociolinguistics / anthropological linguistics, second language acquisition, translation, or intercultural communication for further in-depth analysis. The module consists of 4 contact hours in total. Textbook for the language element of the module: *Studio 21* [B2.2]

*Working knowledge of German required (CEFR level B2). Students should contact the Department of German Studies directly **in advance** to enquire about their suitability for this module. The content of linguistics in GE4717 and GE4718 may be vice versa in a particular year.*

GE4728 Deutsche Literatur und Kultur 4

Spring Year 4
6 ECTS

*This module explores selected themes within literature and the arts, such as multiculturalism in contemporary German society and German-Irish relations or *The Discourse on Bildung in German Culture and Literature*. Topics are subject to change.*

It is planned that this module in Spring 2024 will examine aspects of regional, national, and ethnic identity in the German-speaking world, and how these are reflected in literary texts, films, and other media. Classes normally consist of one lecture in English (culture) and a workshop in German (literature), which are thematically linked. The focus varies from year to year, and has included themes such as multiculturalism in contemporary German society, and German-Irish relations. The module consists of 3 contact hours in total.

Contact sabine.egger@mic.ul.ie for further information and queries regarding suitability for the module.

Working knowledge of German required (CEFR level B2).

History

Autumn semester

HI4721 Power, Belief & Culture in Europe, 1500 – 1750

Autumn Year 1
6 ECTS

This module will explore the rise of the nation state; the Habsburg-Valois wars; the Renaissance; humanism; late medieval Christianity; the Reformation; the Catholic Reformation; the 'rise of capitalism'; European exploration and the 'New World'; the development of political Absolutism; Louis XIV's France; the Glorious Revolution in England, Scotland and Ireland; the Witchcraft trials of the seventeenth century; Non-Christian populations; the Scientific Revolution; the early / radical Enlightenment; proto-industrialisation; early eighteenth century European trade and global contacts.

HI4733 Ireland in the 'Three Kingdoms', 1500-1660

Autumn Year 2
6 ECTS

Historians have increasingly recognised that traditional concentration on the national histories of England, Wales, Scotland and Ireland has impaired our understanding by ignoring the interactions between their populations. This module assesses the usefulness of this more comparative approach, and considers the relationships between the peoples of these islands, allowing students to understand how the sixteenth and seventeenth centuries set the scene for subsequent conflicts. Topics include: an introduction to the New British and Irish History; Centralisation and Union? Scotland, England, Wales and Cornwall; Ireland in the sixteenth century; Ireland in the seventeenth century; the challenges of composite monarchy: The Wars of the Three Kingdoms; Gaelic cultures; the Reformations; religion and belief; languages and histories; migration and plantation; economies and material culture; How successful was the making of Britain?

HI4771 From Revolution to Integration: Europe, 1789–2000

Autumn Year 2
6 ECTS

The module will introduce students to the major themes in European history over the past two centuries. The first half of the module examines the period from the start of the French Revolution in 1789 to the eve of the First World War in 1914. The module will address a number of key subjects: the French Revolution and Napoleonic Europe; the nature of the post-Napoleonic settlement and the challenges to it; social, economic and cultural changes, particularly the impact of industrialisation; the development of nationalism, to include specific case studies (for example, Germany and/or Italy); European engagement with the rest of the world, particularly the 'new' imperialism of the post-1870 period; the diplomatic and other factors leading to the outbreak of the First World War. The second half of the module will examine the 'short twentieth century', or what Eric Hobsbawm described as the 'Age of Extremes'. Topics covered will include, the First World War and post-war violence in Europe; the Russian Revolution; Fascism and Stalinism in the interwar years; the Second World War and the Holocaust; the Cold War and the collapse of European Empires; the rise and fall of Communism in Eastern Europe; and European integration after 1945.

HI4725 Union and rebellion: politics, culture and society in nineteenth-century Ireland

Autumn Year 4
6 ECTS

Nineteenth-century Ireland offered, at once, the possibility of the integration of the island within a wider union with Britain and, ultimately, the failure of that union to win adherence across the country. This module traces the complex political, economic, social and cultural histories which

inform that failure paying particular attention to issues of political mobilisation, state intervention, agrarian resistance, religion and sectarian conflict, poverty and famine, migration and political radicalism, cultural revival, nationalism, unionism and rebellion. By combing political, social and cultural history, the course introduces students to a variety of different approaches to the history of the period and offers a broad and nuanced understanding of developments in pre- and post-Famine Ireland. It also situates the Irish experience within wider comparative and transnational histories of the nineteenth century and investigates notions of Irish exceptionalism.

Not all these courses can be taken due to timetabling constraints.

HI4748 The Irish Diaspora in the United States, 1845-1920

**Autumn Year 4
6 ECTS**

Focusing on the period 1850-1920, this module will investigate the lived experience of Irish immigrants in the United States of America. It will deal with key issues such as the notion of diaspora, the concepts of assimilation and integration, and the evolution of an Irish American identity. While examining areas of commonality, the module will explore differences in the immigrant experience between male and female, urban and rural, east and west, north and south and between first, second and third-generation Irish. Significant changes over time, such as changes in representation, attitudes to Ireland, and labour practices will be evaluated. Students will examine and analyse a diverse array of primary and secondary sources including documentary, newspaper, and visual sources as well as historical documentaries and scholarly articles.

Not all these courses can be taken due to timetabling constraints.

HI4773 Exiles, Migrants Refugees? The Irish in Europe, 1500-1815

**Autumn Year 4
6 ECTS**

This module assesses the history of Irish migration to early modern Europe. The module introduces students to key themes: the causes and geography of Irish migration; the context of political-diplomatic alliances; military migration and the development of Irish regiments abroad; religious and educational migration and the development of Irish colleges; economic migration and the development of merchant houses and networks. The module assess migration in the context of poverty, gender, family migration, assimilation, integration, cultural exchange and identity formation. The module will also examine Irish migration within the imperial networks of Catholic European powers, such as France and Spain. The module will conclude by examining the impact of the French Revolution on Irish migration and its re-orientation in the nineteenth century.

Not all these courses can be taken due to timetabling constraints.

HI4772 Unconventional Warfare in the Twentieth Century

**Autumn Year 4
6 ECTS**

Using three case studies of British counterinsurgency in the twentieth century – Ireland, 1919-1921; Palestine, 1936-39; and Kenya, 1952-56 – this module will chart the evolution of unconventional warfare since 1900. Having studied each individual case, students will then think more broadly about a series of themes and issues: unconventional warfare on film; popular support; harming civilians; and the lessons of unconventional war. The module will explore how guerrillas relate to their communities and the often-uncertain boundaries between the guerrilla and the bandit, fanatic, or terrorist. It will also examine the diverse strategies that conventional forces have developed to meet the very particular problems posed by unconventional war. Students will engage with key debates on the nature of violence, its practitioners, and its victims. They will also engage with relevant primary sources, reflect on historiographical trends, and discuss current controversies on the use of terror and counter-terror.

Not all these courses can be taken due to timetabling constraints.

Spring semester

HI4716 Controversies in History

Spring Year 1
6 ECTS

This module explores key controversies in the history of the western world, specifically in Ireland, Europe and the United States. Structured around three case studies, it offers a pathway for students to understand alternative positions, contrasting viewpoints, and the absence of a certain answer. Case studies can include historiographically contentious issues in the history of politics, gender, social movements, culture, war and conflict. Using large online document collections, it returns students to primary sources and to the perspective of the historical past. It focuses on historians' interpretations of the past and informs students of ways to challenge established narratives and historical beliefs.

HI4784 Kingdom and Colony: Ireland, 1660-1800

Spring Year 2
6 ECTS

This module will introduce students to the major developments of eighteenth century Ireland and allow them to engage with current debates about how to understand them. A strong emphasis will be placed on reading and discussing primary source documents pertaining to the period. Topics include: the Restoration; the 'War of the Two Kings'; the post-1691 settlement and the development of the Protestant Interest; debates about Ireland's constitutional status and the development of Patriotism; the Penal Laws, Jacobitism and Irish Catholic migration overseas; the Presbyterian community; the Irish economy in the eighteenth century; Improvement and Enlightenment; the position of women and children; Catholic politics; the Volunteers and Legislative Independence; the Whiteboys and agrarian violence; radicalism and reaction in the 1790s; the Rebellion of 1798; the Act of Union.

HI4742 Major themes of American history, 1850-1975

Spring Year 2
6 ECTS

This module will focus on the broad themes and developments of American History 1850-1975. It will be framed around essential questions such as slavery; the struggle for civil and political rights; the Civil War; industrialization, urbanization and immigration; the role of government; race, class, and gender relations and America's role as an imperial or global power. Key crises such the Civil War, the Civil Rights movement, McCarthyism, Vietnam and Watergate will be highlighted. Students will examine and analyse a diverse array of primary and secondary sources including documentary, newspaper, and visual sources as well as historical documentaries and scholarly articles.

HI4794 Colonisation of Ireland, AD 1100–1400

Spring Year 2
6 ECTS

The purpose of the module is to introduce students to Ireland's first experience of occupation by an international colonising power, namely the Angevin kings of the twelfth and thirteenth centuries. This period is sometimes described as the beginning of '800 years of English domination' and as such it has played a key part in national discourse on the history and evolution of the Irish nation. In this module, students will be introduced to the history of the period and to interpretative models which include both modern historical perspectives on this period, both Irish (including Nationalist and Unionist) and British but also to modern interpretative models of colonial and post-colonial perspectives and theories of migration.

HI4757 The High Kings of Early Ireland, AD 600-1014**Spring Year 4
6 ECTS**

The purpose of this course is to introduce students to the medieval history of Ireland prior to the year 1000; Genetic influxes during the late prehistoric and early medieval periods – Celts and Vikings; The arrival of writing and Christianity; Sources for Irish political history: annals; Sources for Irish political history: genealogies; Sources for Irish political history: wisdom literature and the law; High-kingship of Tara and the provincial kingdoms; The role of the Church in promoting political hierarchy; The *Eóganacht* rulers of Munster: Cashel Vs Killarney; Feidlimid mac Crimthann and the *Céili Dé*; Viking mercenaries and the establishment of the coastal cities; The origins of Thomond and the rise of the *Dál Cais*; Conclusions.

Not all these courses can be taken due to timetabling constraints.

HI4759 Death and the Afterlife in Early Modern Ireland and Britain**Spring Year 4
6 ECTS**

This module will deal with death and the dead in early modern Ireland and Britain, considering the process of dying; ideas about 'good' and 'bad' deaths; the preparation of dead bodies; funeral rituals; expressions of grief; the location of burial; reasons for the exhumation of corpses; the uses of funerary commemoration; people's expectations of the afterlife; and their ideas about the returning dead (ghosts and revenants). It will engage with the changes brought about by the Reformations in Irish and British Isles, and the ways in which the treatment of the dead can throw light on interactions within communities and between members of different religious and political groups. While the focus is primarily on the period 1450-1750, the ideas and issues encountered will be relevant to other times and places as well.

Not all these courses can be taken due to timetabling constraints.

HI4782 Society, Culture and Politics in Twentieth-Century Ireland**Spring Year 4
6 ECTS**

This module will chart the history of modern Ireland from the final decades of the Act of Union, through revolution and partition, to the creation of two new states and the challenges that followed in the Irish Free State (later the Republic of Ireland) and in Northern Ireland. The module will explore how ordinary people lived in this period, and how family, social, and working lives were impacted by political and cultural change. Topics covered will include sectarianism; the border; political and economic challenges in the two states; religion; class and gender; emigration; the 'Emergency' and neutrality; and the Troubles (c.1968–1998). Students will analyse and evaluate current debates among historians. They will also engage directly with a host of relevant primary source collections (many of which are now available online) including census returns, newspapers, pamphlets and posters, parliamentary debates and reports, letters, diaries, memoirs, and more.

Not all these courses can be taken due to timetabling constraints.

HI4735 Film, history and the long nineteenth century**Spring Year 4
6 ECTS**

The course explores, through the medium of film and written history, central themes in the history of the western world in the long nineteenth century, namely: politics, revolution and war; urbanisation and migration; slavery and race; industry, capitalism and labour; and frontiers and empire. It looks at how filmmakers have represented these central themes in history and how

their representations relate (or don't relate) to the work of historians on the nineteenth century. It uses cases studies of specific films related to these themes to explore how we present, represent and understand the past and the limitations and possibilities of varying approaches to the past. The students will engage not simply with film history but also innovative approaches to the past pioneered by academic historians.

Not all these courses can be taken due to timetabling constraints.

Mathematics

Autumn semester

MH4731 Elementary Number Theory

Autumn Year 1
6 ECTS

Representations of numbers; The binomial theorem; Mathematical induction; Divisibility of integers; Prime Numbers and The Fundamental Theorem of Arithmetic; Euclid's algorithm; Congruence; Linear Diophantine equations; Fermat's Little Theorem; Using congruences to solve more complex problems; Pythagorean Triples.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4713 Linear Algebra

Autumn Year 2
6 ECTS

Vectors and vector spaces, inner products, matrices, games of strategy, linear equations, linear programming, linear mappings, linear transformations.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4763 Calculus 1: Differentiation

Autumn Year 2
6 ECTS

Functions and graphs, slope, Newton quotient and derivative limits, differentiation rules for sums, products, quotients, composite functions, trigonometric functions, logarithms, exponential functions, and their derivatives, continuous functions nested intervals, completeness of the real numbers Intermediate Value Theorem, inverse functions and their derivatives.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4754 Multivariable Calculus

Autumn Year 4
6 ECTS

Real vector spaces of dimension n , lines and planes, curves and surfaces. Calculus of several variables, continuity and derivative. Double and line integrals, surface and volume integrals. Introduction to ordinary and partial differential equations.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4757 Geometry Euclidean and Non Euclidean Geometry

Autumn Year 4
6 ECTS

Basic notions and theorems of Euclidean geometry; analytic geometry; geometric constructions; transformations and symmetry; vectors and dot product; non-Euclidean geometry.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

Spring semester

MH4722 Introduction to Geometry

Spring Year 1
6 ECTS

Angle, distance, length, area; coordinates; lines, triangles and circles; geometric constructions; congruence and similarity.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4774 Introduction to Probability and Statistical Inference

Spring Year 2
6 ECTS

Description of sample data, probability theory, random variables, probability distributions, sampling theory, estimation, hypothesis testing, correlation and regression, testing methods.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4764 Calculus II: Integration

Spring Year 2
6 ECTS

Maxima and minima, boundedness of continuous functions on closed intervals, Rolle's Theorem, Mean Value Theorem, increasing and decreasing functions
antiderivatives, indefinite integrals, integration by parts, substitution
area, Riemann sums, definite integrals, least upper bound, greatest lower bound
Fundamental Theorem of Calculus, Taylor's Formula
infinite series, convergence.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4738 Computational Mathematics

Spring Year 4
6 ECTS

Introduction to a computer algebra system. Calculations in number theory, linear algebra, calculus and in statistics.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

MH4728 Abstract Algebra

Spring Year 4
6 ECTS

Groups, subgroups, Lagrange's theorem. Binary codes. Conjugacy, normal subgroups, permutation groups. Rings, subrings. Integral domains, congruences. Fields.

Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD directly in advance to enquire about their suitability for relevant modules.

Media & Communication Studies

Autumn semester

MC4732 Media Institutions and Audiences

Autumn Year 1
6 ECTS

The module begins with a historical perspective on media looking at the emergence of national institutions, competition with commercial companies and the challenges of alternative broadcasters. The development and use of broadcast media in Ireland is a core resource in this investigation. It proceeds to examine regulatory regimes that shape the contemporary media landscape. The emergence of international media institutions are explored, along with their consequences in terms of globalisation, hegemony and ideology. The programme continues thematically to cover such issues as propaganda, democracy and censorship.

The module introduces qualitative and quantitative research techniques through practical assignments on student consumption practices. Contemporary case studies are used to illustrate and explain critical theories. These include reality TV game shows, pornography, social media and disinformation.

Please contact Dr. Tony Langlois if you intend to study this module (Tony.Langlois@mic.ul.ie)

MC4714 Sociology of the Media

Autumn Year 2
6 ECTS

To provide students with a critical understanding of the media from a sociological point of view. To introduce students to key aspects of the debate amongst social scientists about the workings and influence of the media.

Please contact Dr. Tony Langlois if you intend to study this module (Tony.Langlois@mic.ul.ie)

MC4712 Introduction to Basic Media Pre-Production and Production

Autumn Year 2
6 ECTS

This module will introduce students to the pre-production and production stages of programme-making in different media.

Only if places are available.

Please contact Mr. Nicky Fennell if you intend to study this module (Nicky.Fennell@mic.ul.ie)

MC4787 Television and New Media

Autumn Year 4
6 ECTS

This module provides an overview of television's impact on society and on its future in the context of new media platforms, media convergence and social media. Focusing on examples of documentary, news, drama, reality and lifestyle television it examines the cultural politics of representation of gender, race, class and national identity in these genres, and how forms of representation relate to broader social and political change within and across nation states. The module ranges in scope from media production through forms of representation and television consumption, primarily using Irish, British and American case material. The module also considers the impact of 'new media' such as internet/smart TV accessible platforms like Netflix, Disney+ and YouTube, together with social media, on how television is consumed, shared and interpreted.

Please contact Dr. Marcus Free if you intend to study this module (Marcus.Free@mic.ul.ie)

MC4723 Dramatic Art & Communication**Autumn Year 4
6 ECTS**

A practical course in scriptwriting. To give students an understanding of the process of communication through drama and develop their skills in writing for film, television and radio. Students will develop their skills through a series of exercises and workshops.

Only if places available.

*Please contact Dr. Susan Liddy if you intend to study this module
(Susan.Liddy@mic.ul.ie)*

Spring semester**MC4731 Media Texts and Audiences****Spring Year 1
6 ECTS**

The creation, interpretation and negotiation of meaning in the mass media and new social media are explored. Critical theories of media and the fundamentals of communication theory are introduced. Media texts are interrogated in order to understand how meaning is produced by producers and received and negotiated by audiences. The role texts play in informing worldviews and individual actions are explored.. The relationship between producer, text and audience is deliberated. Theories of Semiotics (Peirce, Saussure) and the Rhetoric of the Image (Barthes) provide the frameworks for an exploration of advertising. The politics of representation and the worlds of story-telling in photojournalism and film are addressed. The challenges of the changing nature of the media landscape and of new knowledge environments are considered to position students as empowered critical users of social media.

*Please contact Dr. Kathy Cush if you intend to study this module
(Kathy.Cush@mic.ul.ie)*

MC4713 Film Studies**Spring Year 2
6 ECTS**

To introduce students to the aesthetic and narrative codes of cinema and consider these codes in the wider context of the film industry and the relation between cinema and economics in an international form.

*Please contact Dr. Marcus Free if you intend to study this module
(Marcus.Free@mic.ul.ie)*

MC4724 Journalism**Spring Year 2
6 ECTS**

To examine the current debates surrounding the process of communication and the exchange of messages. To permit the student to explore the potentialities of the print, radio and television media and to master the skills and disciplines necessary for effective preparation of material for presentation in the context of these media.

Only if places available.

Please contact Dr. Tony Langlois if you intend to study this module (Tony.Langlois@mic.ul.ie)

MC4727 Media, Culture & Society**Spring Year 4
6 ECTS**

To make the student aware of the full potential of audio and video resources as communication and instructional tools; to carry out a number of controlled exercises designed to increase the

student's knowledge of audio and video production equipment, its scope and its limitations, and to enable the student to [i] identify the characteristics and advantages of a systematic approach to audio and video production, [ii] operate audio and video equipment appropriate to its intended application, [iii] set up and operate lighting equipment, [iv] select and prepare an appropriate method of presentation for a given subject or topic, [v] recognise the importance and characteristics of programme format and presentation style.

*Please contact Dr. Rosemary Day if you intend to study this module
(Rosemary.Day@mic.ul.ie)*

MC4718 Audio and Video Production & Post-Production

**Spring Year 4
6 ECTS**

To make the student aware of the full potential of audio and video resources as communication and instructional tools; to carry out a number of controlled exercises designed to increase the student's knowledge of audio and video production equipment, its scope and its limitations, and to enable the student to [i] identify the characteristics and advantages of a systematic approach to audio and video production, [ii] operate audio and video equipment appropriate to its intended application, [iii] set up and operate lighting equipment, [iv] select and prepare an appropriate method of presentation for a given subject or topic, [v] recognise the importance and characteristics of programme format and presentation style.

Only if places available.

Proven prior experience / tuition essential.

Contact Mr. Nicky Fennell if you intend to study this module (Nicky.Fennell@mic.ul.ie)

Music

Please note: Given the varying levels of ability of incoming international exchange students, they are required to contact the HoD Gareth Cox (gareth.cox@mic.ul.ie) directly **in advance** to enquire about their suitability for relevant modules.

The Music modules often include many different components and they may wish to only take some of them or 'mix and match' across two modules or just audit parts thereof. The Department has always been very flexible in this regard and is willing to accept a separate assignment in some cases.

The Department may also award international exchange students a part-grade for Choral Society participation.

Autumn semester

MU4711 Introduction to Music I

Autumn Year 1
6 ECTS

Course Aims and Objectives: To provide the students with an understanding of the rudiments, terminology and language of tonal music with a course of ear training and keyboard harmony and an introduction to sonata form.

Course Syllabus: The construction of intervals, scales, modes and chords; the theory of figured bass as a system of writing and analysing chord progressions; the bass line as a foundation for understanding tonal harmony; the elements of melodic construction in classical music; simple textures in piano and vocal music; the skills necessary for aural dictation and analysis of simple melodies and harmonic progressions; definitions of technical terms; the skills necessary for singing a melody from sight; common rhythmic patterns in a variety of metres; binary and ternary form; sonata form.

MU4713 The Music of the Baroque Era / Theory & Techniques

Autumn Year 2
6 ECTS

Course Aims and Objectives: To provide students with an overview of important issues and key developments in music during the period c1600–1750; To examine selected works from this period and also issues related to the performance of baroque music; To further students' knowledge of four-part harmony and to introduce figured bass and trio writing.

Course Syllabus:

[a] Lectures:

Theory & Techniques—The harmonization of hymn tunes for SATB; the figuring of, typically, short trio sonata movements by Corelli; the addition of S, A and T parts in realizing a short figured bass line; and the completion of either or both of the violin parts in an extract from a trio sonata movement.

History—Introduction to Baroque era; stylistic overview of Baroque music; Seventeenth-century Italy 1: secular song, opera, sacred music; Seventeenth-century Italy 2: instrumental music, women composers; Corelli and the trio sonata; Seventeenth-century Germany and Central Europe: keyboard music, Schütz, Biber; French music of the *grand*

siècle: Lully & opera; keyboard music; Seventeenth-century England: Purcell; Late Baroque

1: Handel and oratorio; Late Baroque

2: Bach's instrumental music; Late Baroque

3: Vivaldi and the concerto

[b] Tutorials:

Beginning in Week 2, students are required to attend a weekly tutorial to support their learning in lectures and help them to prepare for assessment tasks.

MU4723 The Music of the Classical Period / Theory & Techniques**Autumn Year 2**
6 ECTS

Course Aims and Objectives: To provide students with an overview of key developments in music during the period c1740–c1805; To study the development and expansion of relevant forms and genres; To examine selected works from this period; To introduce string quartet writing

Course Syllabus:**[a] Lectures:**

Introduction to Classical era; stylistic overview of the period; Mannheim; Haydn, Mozart, Early Beethoven; string quartet writing, forms, techniques, late 18th C harmony, symphony, concerto, musical language of Classical era, development of 18thC orchestra; developments in the history of opera; textual criticism of primary source documents; critique of operatic productions;

[b] Tutorials:

Students are required to attend occasional tutorials for assistance with their string quartet writing.

MU4717 Popular Music & Jazz / Free Composition**Autumn Year 4**
6 ECTS**Course Aims and Objectives:**

Popular Music: To introduce students to the history and language of popular music, film music, and jazz.

Composition: To introduce students to composing music of the early twentieth century and handling dissonance; To provide students with an overview of theme and variations, one of the forms in which improvisation flourishes; To foster accuracy in the notation of compositions, and, more generally, to examine discrepancies between sound and symbol that occur in students' work.

Course Syllabus:

Popular music and its Development. The Evolution of Jazz [Ragtime, Dixie, The Big Band Era, Blues, Modern Jazz etc]. Film Music; the development of rock music and its connection with the blues, intellectual trends in study of rock music. Composition: Theme and Variations; Whole-Tone; Quartal & Quintal; Bitonality; Free Atonality.

MU4728 The Music of the 19th Century / Theory & Techniques**Autumn Year 4**
6 ECTS

Course Aims and Objectives: To introduce students to the music of nineteenth-century Europe in its social and political contexts and chromatic harmony techniques; to make students aware of current musicological trends in the study of this period

Course Syllabus:

The Rise of Musical Romanticism. The symphony after Beethoven, the Lied, Programme Music, Opera and Music Drama, Chromatic Harmony and Orchestration. Musical nationalism, Virtuosity, Critical editions, Aesthetics, Critical and theoretical writings, Analysis, Performance practice, Musical Life in 19th Century Ireland.

Spring semester

MU4712 Introduction to Music II

Spring Year 1
6 ECTS

Course Aims and Objectives: To give the student a further understanding of the rudiments and language of music with a course of ear training and keyboard harmony. To provide students with an overview of two contrasting topics in a) Western art music up to c1750 b) music of the nineteenth century c) music of the twentieth century. To require a student to present two contrasting pieces on the instrument[s] [or voice] of their choice.

Course Syllabus:

The construction of intervals, scales, modes and chords; the theory of figured bass as a system of writing and analysing chord progressions; the bass line as a foundation for understanding tonal harmony; the elements of melodic construction in classical music; simple textures in piano and vocal music; the skills necessary for aural dictation and analysis of simple melodies and harmonic progressions; definitions of technical terms; the skills necessary for singing a melody from sight; common rhythmic patterns in a variety of metres; case studies in music history. Aspects of Music History: Topics generally vary from year to year.

MU4714 Early Music / Theory & Techniques

Spring Year 2
6 ECTS

Course Aims and Objectives: To provide an overview of important issues and key developments in Western music to c1600; To examine selected works from this period and also issues related to the performance of early music; To further students' knowledge of theory and techniques, introducing elementary eighteenth-century counterpoint in two parts and chorale writing in the style of Bach.

Course Syllabus:

[a] Lectures:

Theory & Techniques—Introduction to eighteenth-century counterpoint; principles of two-part counterpoint; the writing of short two-part pieces [non-imitative and imitative]; the Bach chorale: melodic and harmonic characteristics; cadences; harmonic resources; modulation; consecutives; unessential material; texture in the chorales; modal chorales; an approach to writing chorales in the style of Bach.

History— Introduction; sacred monophonic song: plainchant; secular monophonic song; the beginnings of polyphony; Notre Dame school; Ars Nova [focus: Machaut's *Messe de Notre Dame* [between c1350 and c1372]]; Early Renaissance [c1420-c1490]; High Renaissance [c1490-c1520]; Josquin Des Prez [c1445-1521]; High Renaissance contd [c1520-c1560]; Late Renaissance [c1560-c1600].

[b] Tutorials:

Beginning in Week 2, students are required to attend a weekly tutorial to support their learning in lectures and help them to prepare for assessment tasks.

MU4724 Irish Traditional Music / Theory & Techniques

Spring Year 2
6 ECTS

Course Aims and Objectives:

To provide a general introduction to the field of Irish traditional music and song; to understand it in relation to its historical, social and international contexts; to examine it in the light of contemporary ethnomusicological and vernacular-culture theory; to develop the specific analytical skills required to appreciate this musical field. To introduce students to arranging for SATB. Perform three contrasting pieces on the instrument[s] [or voice] of their choice.

Course Syllabus:

The nature of vernacular culture and music; the international context of Irish traditional music; analytical approaches – ethnomusicology, cultural studies, vernacular-culture theory; historical background and social context of performance; the development of the concept of “Irish Music”; folk-music collectors and available sources; the “Irish harp” tradition; vocal tradition, Irish language – *sean nós*, melodic and prosodic forms, textual features; vocal tradition, English language historical forms; Hiberno-English song – melodic and linguistic features; the history of Irish vernacular dance and its relationship to instrumental traditional music; the instruments of Irish traditional music – historical development, social usage, concepts of technique, modern developments; the development of ensemble performance; pedagogic traditions and concepts.

MU4718 The Music of the 20th Century / Applied Music

Spring Year 4
6 ECTS

Course Aims and Objectives: To introduce students to important developments in music during the twentieth century and to acquaint them with the various movements and musical languages. To examine selected works from this period. To require a student to present a short programme of c. 15 minutes on the instrument[s] [or voice] of their choice.

Course Syllabus:

The musical language, techniques and selected works of *inter alia*, Debussy, Mahler, Stravinsky, Schoenberg, Webern, Berg, Bartók, Messiaen, Cage, Stockhausen etc.

MU4727 Music Technology/ Analysis

Spring Year 4
6 ECTS

Course Aims and Objectives:

Computer Music: To become proficient in using computer software and hardware for creating, editing and sharing sound files and musical scores.

Analytical Theory: To understand the main developments in, and techniques and theories of, music analysis.

Course Syllabus:

Computer Music: Inputting and editing musical notes using MIDI-based technology; Creating and editing digital sound files using MIDI and Audio virtual studio technology; recording of digital audio files; using the internet as a resource for music file sharing

Analytical Theory: Introduction to Analytical Theory; Schenker; Feminism; Tovey; Keller; Réti; Set Theory.

Philosophy

Autumn semester

PI4721 Fundamental Human Questions

Autumn Year 1
6 ECTS

This module offers an accessible introduction to some of philosophy's most fundamental and hotly debated topics. It provides students with the skills and historical and conceptual background necessary to access, understand and engage with core debates in ethics, social justice, knowledge and unjustified belief, existence, and topics in the philosophy of mind, language, and religion.

The module emphasises developing critical thinking through analysis of arguments and concepts, evaluation of competing interpretations, discussion of objections, counterarguments and competing evidence. It also aims to develop precise, efficient, and coherent academic writing and oral communication skills.

Questions discussed in this module include: What is justice? Can we achieve it for all? What is, if any, the goal of our life? How can we explain the difference between science and pseudo-science? What is the philosophical foundation of human rights? The module will also include philosophical debates and moral dilemmas about immigration, emotions, alternative facts, racism, consent, and criminal justice.

Along with the lectures, students are required to attend tutorials once a week, starting from week 3.

PI4728 Ethics

Autumn Year 2
6 ECTS

In this module students study ethics, or the philosophy of moral actions. There are two distinct approaches to doing this, following some preliminary discussion of the nature of the moral or ethical to begin with. First, some current ethical debates are studied, which pose the problem as to how one ought to act, arriving at certain principles of moral action arising inductively from discussion and development of these key issues in current debate. In Part II, we will move on to the theoretical consideration of Ethics in some of its key theories and most important writers, critically appraising each theory, and asking which, in the end, is most satisfactory. Notable contemporary writers include Elizabeth Anscombe, Roger Scruton, Philippa Foot, Mary Midgely and Alasdair MacIntyre.

PI4744 Political Philosophy

Autumn Year 2
6 ECTS

In this course we cover some of the most important questions of contemporary political philosophy. These include the following: How should societies and communities great and small be organised? How are citizens formed and how should they be educated? What are the rights and obligations of citizens and from what do they stem? What should be the spaces for, goals of, and obligations for civic participation? Who is the global citizen, if one exists, and what is their role and function in society? What is global justice and how can we make sure it applies to everyone? Does something like intergenerational justice exist and what is it based upon?

PI4777 Philosophy of Science and Technology

Autumn Year 4
6 ECTS

The aim is twofold: to cover both historical and contemporary philosophical conceptions of science and technology, and to cover and problematize the relation of philosophy to science and technology.

PI4717 Contemporary European Thought & Culture**Autumn Year 4
6 ECTS**

The main trends in European philosophical thought from phenomenology through existentialism and Marxism to Post-Modernism.

Spring semester**PI4722 Philosophy & Film****Spring Year 1
6 ECTS**

This module is designed to introduce students to certain key issues in the relation between philosophy and film and to the reasons why there is, at present, a growing interest in the relation between these means of expression. It will also explore some of the ways in which film can significantly contribute to reflection on certain ethical, metaphysical, religious and epistemological matters.

To be confirmed

PI4732 Philosophy of Love and Desire**Spring Year 1
6 ECTS**

This module adopts a conventional historical approach to Philosophy. The historical approach aims at tracing the roots of common views and ideas about love and desire in western culture. The main historical moments considered are: Classic Philosophy, Medieval Philosophy, Modern Philosophy and Contemporary Philosophy.

Beside the historical approach, students are encouraged to practice conceptual analysis and critical thinking during class and tutorials, establishing an interactive dialogue with the lecturer(s).

Along with the lectures, students are required to attend tutorials once a week, starting from week 3.

To be confirmed

PI4743 Knowledge, Critique, and Modernity**Spring Year 2
6 ECTS**

This module examines the transformation of the entire Western intellectual tradition effected by the work of the rationalist and empiricist philosophers of this period, culminating in the transcendental idealism of Kant.

PI4712 Greek Philosophy**Spring Year 2
6 ECTS**

The module examines the golden age of Greek philosophising which began with Socrates (470-3990), was continued by Plato (429-348) and was brought to a conclusion by Aristotle (384-322). The course begins with an account of Socrates and the Sophists; significant time is dedicated to Socratic dialectic as a way of reaching moral values, principally Justice; contemporary implications of this are discussed. Plato's account of the trial of Socrates is studied in detail; the Platonic theory of knowledge, of the Forms/Ideas, of the soul are all introduced. The political theory of The Republic is introduced. The course finishes with a brief account of Aristotle's logic and epistemology, his hylemorphic and causal analysis of nature to explain its changeableness and of eudaimonia, the goal of the virtues.

PI4718 Philosophy of God & Religion**Spring Year 4
6 ECTS**

This module investigates the questions of the existence and nature of God in the light of contemporary thought and examines the philosophical significance of religion as a trans-cultural phenomenon.

PI4747 Aesthetics**Spring Year 4
6 ECTS**

This module looks at theories of the nature of art and aesthetic judgment: art as representation, art as expression, genre and tradition, art as play, the institutional theory of the 'artworld', and art as ideological formation.

Psychology

The Psychology modules have undergone some changes, specifically regarding the module codes and titles. Please find old codes and titles with each modified module for your convenience.

Autumn semester

PS4721 Individual and Development Influences on Behaviour	Autumn Year 1 6 ECTS
--	---------------------------------

This module aims to introduce students to past and present theories of Psychology and the methods and concepts adopted by psychologists in their pursuit of knowledge and understanding of mind and behaviour. It encourages students to take a critical approach to the study of Psychology and to foster an appreciation of evidence-based applications of Psychology.

Old Code and Title: PS4001 Introduction to Psychology

PS4741 Introduction to Research	Autumn Year 2 6 ECTS
--	---------------------------------

This module aims to acquaint students with some of the rudimentary principles of scientific experimentation as applied to psychology. Students will explore a range of research methodologies and experience basic statistical techniques that are used to analyse data in psychology as well as an understanding of research design and report writing.

Old Code and Title: PS4003 Research, Design & Methodology 1

PSXXXX Psychology and Social Justice New module	Autumn Year 2 6 ECTS
---	---------------------------------

This module will examine how structural inequalities in society such as poverty and the global climate crisis are impacting on the psychological health of people. It will explore how psychology and psychological research has, and can be, applied to policy and political action. It will also explore how open scholarship and research may provide a conduit for social justice and social change, how this movement may not only foster better research within psychology but also dismantle the barriers to accessing this research for those who need access to drive social change.

PS4088 Controversies in Psychology	Autumn Year 2 6 ECTS
---	---------------------------------

A debate- and discussion-based introduction to issues affecting mainstream psychological research and practice. Examining questions such as the nature-nature debate, whether Psychology can be considered a science, the implications of free will on Psychology and the possibility of biases or prejudices within different theoretical backgrounds. Other broad issues that remain controversial in the discipline, such as the role of consciousness in psychology, will also be addressed.

PS4731 Cognitive Psychology	Autumn Year 2 6 ECTS
------------------------------------	---------------------------------

The aim of this module is to introduce you to Cognitive Psychology, the branch of Psychology concerned with the processing of information and acquisition and use of knowledge.

Old Code and Title: PS4013 Cognitive Psychology 1

PS4747 Applied Social Psychology**Autumn Year 4
6 ECTS**

Social Psychology II examines issues in theory and research in areas of advanced social psychology.

Old Code and Title: PS4007 Social Psychology 2

Spring semester**PSXXXX Introduction to Social Psychology**

New code and title

**Spring Year 1
6 ECTS**

Social Psychology 1 aims to stimulate student interest and motivation to study the scientific approach to our understanding of individuals and their behaviour in small groups. This introductory level course explores the theoretical basis of current theories and research in four major divisions of Social Psychology: namely, social cognition, social influence, social relations and applied social psychology.

Old Code and Title: PS4002 Historical and Social Influences on Behaviour. Awaiting new code from SAA

Students must enrol and engage with this module no later than week 1.

No student will be accepted after week 1.

PS4752 Individuality, Difference and Psychological Science**Spring Year 2
6 ECTS**

Students will work in groups to develop responses to questions and problems regarding psychological differences. In doing so, students will explore the science of what makes people unique or different from one another. Note: This module is delivered through problem-based learning (PBL). This involves working closely and continually in groups with other students, collaborating both in person and in writing.

Old Code and Title: PS4752 Individuality, Difference and Psychological Science

Note: This module is delivered through problem-based learning (PBL). This involves working closely and continually in groups with other students, collaborating both in person and in writing.

PS4732 Developmental Psychology**Spring Year 2
6 ECTS**

The aim of this module is to provide a general overview of human development over the lifespan but with a specific focus on the physical, social, emotional and cognitive developmental stages upto and including middle childhood. The major theoretical approaches to lifespan development (psychoanalytic, cognitive, behavioural, ethological and ecological) will also be introduced, as will typical research methods and characteristics of this core area of psychology.

Old Code and Title: PS4004 Developmental Psychology 1

PSXXXX Human Behaviour and Mental Health

New code and title

**Spring Year 3
6 ECTS**

Students explore and discuss contemporary approaches to abnormal psychology and the research methods most pertinent to this area. There is comprehensive coverage of various categories of mental health difficulties such as mood disorders (depression, anxiety, panic, phobias), cognitive

disorders (dementia, delirium and amnesias), psychoses (schizophrenia, dissociative disorders), sexual disorders (e.g. paraphilias, sexual dysfunctions) and developmental disorders (autism, behavioural disorders). Students are encouraged to develop a critical awareness of the complex issues involved in diagnosis and treatment of psychological difficulties and to be cognisant of the ethical issues pertaining to this area of psychological study. During the course of the module students will be given the opportunity to critically evaluate research and clinical practice encountered during the course.

Old Code and Title: PS4015 Abnormal Psychology

PS4752 Sports Psychology

**Spring Year 3
6 ECTS**

Sport psychology has grown exponentially over the past few decades, both in terms of research and practice. Sport Psychologists work to support athletes, clubs, and organisations to maximise performance and wellbeing. This is a valuable avenue of undergraduate exploration to enable students to explore the application of psychological research in a specific context, to potentially identify a future career path, or to gain a greater understanding of how individuals can thrive in challenging circumstances.

Old Code and Title: PS4736 Sports Psychology

Theology and Religious Studies

Autumn semester

RS4001 Religion & World Religions

**Autumn Year 1
6 ECTS**

To introduce students to the phenomenon of religion and to the belief systems and foundational texts of the major world religions. To engage students in a critical dialogue with the major world religions from within the perspective of the Christian tradition. The phenomenon of religion as seen as a possible answer and challenge to the human search for meaning. The nature of religion, and the critiques levelled at it by authors such as Feuerbach, Marx, Nietzsche, and Freud. Introduction to some of the major world religions, such as Hinduism, Buddhism, Chinese traditions, Judaism, Islam, and Christianity. The world-views and ideas of each religion, and their foundational texts. Specific practices and political and sociological implications of different religions. Inter-faith dialogue between Christianity and the major world religions. The concept of worldview, esp. Hedonism, Nihilism, Materialism Atheism, Spiritualism, Animism, Humanism. Ethically, the following approaches will be considered: Utilitarianism, Situationalism, Consequentialism and Teleologicalism along with determinate versus indeterminate approaches to life.

Upon successful completion of this module, the student should:

1. Be able to understand, at least partially, the phenomenon of religion;
2. Be able to critique a religion;
3. Be able to appreciate the great questions that religion tries to answer;
4. Be able to appreciate and understand the stance taken by some philosophers of religion;
5. Have knowledge of the origin, formation, belief systems and texts of the main classical religions;

6. Have a knowledge of the origin, formation, belief systems and texts of the modern religions which are part of the Irish religious landscape;
 7. Have a knowledge of the global ethic project;
- Have an understanding of interfaith-dialogue.

RS4023 Christology

Autumn Year 2
6 ECTS

To introduce students to theological reflection on Jesus of Nazareth. The distinctive character of the teaching of Jesus in its cultural and historical context. The various starting points for Christological study. The miracles and the parables and their role in Jesus' proclamation of the Reign of God. The significance of the ministry, death and resurrection of Christ. The humanity and divinity of Christ: the development of Christological doctrine and the debate from the Council of Nicea to the present. Different approaches to Christology today. Christ in inter-religious dialogue: the challenge of other religions and ideologies.

RS4043 Gender & Religion

Autumn Year 2
6 ECTS

To introduce students to the role of gender in religious experience and tradition. The relationship between gender roles in societies and religions, and in particular the Christian Churches. The contribution of women to the development of the Christian tradition. Feminist theological reflection on the Christian doctrine of God. Feminist Biblical interpretation. Feminist theological ethics. Current feminist thinking and the response of the Churches.

Upon successful completion of this module, the student should be able to:

1. Describe the role of gender in religion and society;
2. Critically analyse feminist critiques of religion;
3. Employ feminist terms and concepts in theological discourse;
4. Reflect upon the implications of gender issues within their own context.

RS4007 Approaches to God

Autumn Year 4
6 ECTS

To examine the major themes involving the God-question from a Christian perspective thereby providing students with a solid grounding in some of the key issues in systematic theology. The Christian understanding of God. The origins, development, and the relevance of the doctrine of the Trinity. The problem of evil and theodicy. The atheist critique of faith and belief. The Christian understanding of eschatology. writings of key thinkers from the patristic, medieval and modern eras as illustrating the manifold nature of the Christian understanding of God throughout the tradition.

RS4037 Selected Topics in Applied Moral Theology

Autumn Year 4
6 ECTS

The aim of this module is to enable students to gain an in-depth knowledge of Christian Anthropology in contemporary society with particular regard to the influences of consumerism and technology. Upon successful completion of this module, the student should be able to:

1. Outline the key themes in Christian anthropology and in the Christian vision of the human person.
2. Formulate an in-depth analysis, critique and evaluation of selected themes in consumerism and technology from a Christian anthropological perspective.
Discuss and debate key moral and ethical issues as they affect people in society today, with particular emphasis on the commodification of human life.

Spring semester

RS4011 Introduction to Systematic Theology

**Spring Year 1
6 ECTS**

To provide students with an overview of Christian theology and some of its major themes. To engage students in a critical reflection on the nature of the theological disciplines. Introduction to Christian theology: its nature and history, and its various disciplines. The meaning of Divine Revelation. Faith and belief. The Scriptural basis of theology, including the origin and authority of the Bible. The Christian understanding of God as Trinity. Creation and the problem of evil. Grace and Original Sin. The person of Christ and his role in salvation. The Spirit and the Church. Eschatology.

Upon successful completion of this module students should be able to:

1. Demonstrate a familiarity with the basic Christian doctrines;
2. Show how the scriptures were formed and how one engages critically with biblical texts today;
3. Identify key texts for the study of central doctrines of the Christian tradition.

RS4013 Theology of the Second Testament

**Spring Year 2
6 ECTS**

To enable students to gain an appreciation of the New Testament in its historical and social context. To introduce students to the main themes of the Second Testament books and to develop methodological skills. The historical, geographical, and social background of the New Testament books. The origins, formation and transmission of the Second Testament. New Testament writings as rooted in the Old Testament and the Jewish tradition. The canon of the New Testament. The form and content of the First Testament books: the Synoptic Gospels, the Acts of the Apostles, the Johannine Literature, and the Pauline Letters. Biblical methodology and exegesis of key New Testament texts for their theological significance.

Upon successful completion of this module, the student should be able to:

1. Describe the historical and social context of the New Testament;
2. Outline the origins, formation and transmission of the New Testament texts;
3. Identify different literary genres in the New Testament and apply appropriate reading strategies to each;
4. Explain New Testament themes and images in light of their Old Testament background;
5. Discuss, compare and contrast the way key themes are dealt with in different parts of the New Testament.

To be confirmed

RS4033 Fundamental Moral Theology and Christian Ethics

**Spring Year 2
6 ECTS**

To introduce students to the foundations of Christian ethics, and to engage students in a critical reflection on the nature of moral theology. The nature of morality. The relationship between religion and ethics. The history and development of moral theology as a discipline. The sources and methods of moral theology, and its contemporary context. The role of the Bible in Christian ethics. The debate about whether or not there is a specific Christian morality. Human freedom, knowledge, moral responsibility, and the relationship between them. The concept of conscience. The natural law in tradition and today. The notion of sin in Scripture, tradition, and modern theological reflection.

Upon successful completion of this module, students should be able to:

1. Describe the historical development of moral theology as a discipline, as well as its methods and sources;
2. Explain key concepts in fundamental moral theology;
3. Differentiate between, assess and appraise scholarly positions in moral theology;
4. Construct, develop and sustain a moral theological argument.

To be confirmed

RS4027 Ritual and Sacraments

**Spring Year 4
6 ECTS**

To enable students to gain an appreciation of the role of ritual and worship in Christianity. To provide students with a basic theological and historical knowledge of the Christian sacraments. The concepts of ritual and symbol. Liturgy and worship. The concept of sacramentality. Christ as the primordial sacrament of God, and the Church as a basic sacrament. Outline of the historical development and theology of the sacraments, with special emphasis on Baptism and Eucharist. Ecumenical and contemporary pastoral considerations concerning liturgy and the sacraments. Particular issues [e.g. the liturgical year, the Rite of Christian Initiation of Adults, etc.]

1. Upon successful completion of this module, students should be able to:
2. Show how sacramental theology informs liturgical practices in the Christian tradition;
3. Analyse the development of key ideas in the Christian understanding of the Sacraments;
4. Critically evaluate liturgical celebrations in the light of their theological understandings.

To be confirmed

RS4017 Ecclesiology

**Spring Year 4
6 ECTS**

To introduce students to the ecclesial dimension of Christianity. The Biblical roots of ecclesial consciousness and the origins of the Christian Church. Survey of the main events in the history and life of the Church: pre-Constantinian Christianity; from Constantine to the East-West schism; the Reformation and the Council of Trent; Vatican I to Vatican II; the ecumenical movement; current and possible future developments. The nature of the Church and its marks. Models as a means of understanding ecclesiology. Salvation outside the Church. Ministries. Issues concerning ecclesial authority and structures. Special questions in ecclesiology.

Upon successful completion of this module, the student should be able to:

1. Describe the historical and social context of the New Testament Church;
2. Outline the origins, formation and development of Church in the first five centuries;
3. Identify and discuss the main pivotal events in the Church;
4. Discuss the key issues relation to the reformation and post reformation;
5. Discuss, compare and contrast the pre and post Vatican 11 Churches;
6. Use models as a means of grappling with the mystery of Church;
7. Understand the challenges and opportunities for being Church in modern Irish Society;
8. Understand issues relating to Ecumenism.

To be confirmed

Electives

Autumn semester

GS4713 Women and History

Autumn Year 2
6 ECTS

To create an understanding of how women have been hidden from history and rendered invisible in mainstream texts. To focus specifically on the situation and experiences of Irish women in the nineteenth and early twentieth century and develop an understanding of the richness and diversity of their contribution. Develop a theoretical understanding of the development and evolution of first wave feminism in Irish society.

Only if places are available.

Please contact Dr. Susan Liddy if you intend to study this module (Susan.Liddy@mic.ul.ie)

Spring semester

GS4714 Women in Contemporary Irish Society

Spring Year 2
6 ECTS

Students will acquire a theoretical and practical understanding of feminist debates in contemporary Irish society and become familiar with current issues. Be able to contextualize the lives of Irish women in the 21st century. Develop a critical understanding of the intersection between gender, race and class.

Only if places are available.

Please contact Dr. Susan Liddy if you intend to study this module (Susan.Liddy@mic.ul.ie)
